

Sample PDF file

A clean, one-page document for testing viewers, uploads and text extraction. Made by Technology Channel.

A good test file is boring in the best possible way. It opens everywhere, it is exactly what its name says, and it behaves the same way every time you use it. When a bug appears, you want to be sure the problem is in your code and not in a half-broken file you found somewhere online. That is why every file in this collection is generated from scratch, checked after it is written, and labelled with the details that matter: size, dimensions, duration, page count or row count.

What you can test with this file

- Opening and rendering a standard A4 PDF in browsers and apps.
- Upload forms that accept PDF documents.
- Text extraction, search and copy-and-paste.
- Thumbnail and preview generation.
- Printing and print-to-PDF round trips.

File details

Property	Value
Pages	1
Page size	A4 (210 × 297 mm)
Fonts	Poppins and Inter, embedded subsets
Author	Technology Channel
License	Free for testing and development
